

WED FEB 15 4:30-5:30

TECHNOLOGY SAFETY PARENT WORKSHOP

What every parent should know about filtering and security in a world of unlimited data.

In today's world, parents need to be vigilant in monitoring and protecting their student's devices. Come and learn easy and simple things you can do to protect your home network, protect and monitor your family's cell phones, as well as helping your student learn to manage the time they spend on their devices. There will be a session from 4:30-5 and then repeated from 5-5:30.

This workshop will be led by Angela Rogers, our PTSA President and member of our School Community Council. Angela has a degree in Computer Science from BYU and is the owner of Oak Lane Solutions where she does contract web and app development, and is a member of the Parent Advisory Committee for MMGuardian, maker of parental control apps for Android and iPhone. She is excited to help educate parents about the resources that exist to help keep their family safe from the dangers online.

Held in the Salem Hills High School Library between Parent Teacher Conference Sessions

Earn entries for our PTSA prize drawing by attending!

Sponsored by Salem Hills High School, the PTSA, and the School Community Council.

Everyone is welcome.
